- Collaborated closely with the entire backend support team, providing 24/7 assistance to ensure smooth operations and immediate issue resolution during critical phases of the project.
- Leveraged cutting-edge technologies including Node JS and AWS cloud to develop and implement crucial components of the project, ensuring seamless performance and scalability.
- Utilized TCS Manage, an internal tool, to enhance project efficiency and collaboration, streamlining communication and coordination between different teams.
- Gained valuable experience in team management by supervising and mentoring new joiners, helping them integrate into the project and achieve optimal productivity.

PROJECTS 🔗

Snake Feed game 🔗

- Developed an interactive Java program where a virtual snake consumes food to increase its size dynamically.
- Designed as an entertaining project, it also serves as an educational tool to demonstrate basic game mechanics and Java programming concepts.

A Computer Game 🔗

- Developed A captivating computer game developed using C and Java.
- Game involving a paddle, ball, and bricks where we have to control the paddle to keep the ball in play, hitting and breaking bricks to score points.
- We have to control the paddle's movement to prevent the ball from escaping; missing the ball results in game over
